

SRS 6

Requirement Engineering Questionnaire

Internet Lab Management System

Functional Requirements

SR #	Questions	N/A	UN	VL	L	A	H	VH
1	Is authentication of the user by entering the name, password, account number?							
2	Should login/account detail be stored in database?							
3	Should there any type of utility is used for checking the user status of various users using the system?							
4	Should administrator have complete access to detail of user account?							
5	Should admin change the password of user account?							
6	Should User register himself/herself?							
7	Should Admin add new account?							
8	Should Admin see User statistics?							
9	Should Admin be able to change the Rate of Internet usage per minute?							
10	Can user view his/her current balance?							
11	Can Admin add Balance to a user's account?							
12	Can user add balance himself by credit cards, etc?							

Non Functional Requirements

SR #	Questions	N/A	UN	VL	L	A	H	VH
1	Should ILMS be open source?							
2	Should there be controlled over illegal duplication of reports?							
3	Should there be separate login for each user to increase security?							
4	Can you allow the unlimited downloading to your user/client while they using internet?							
5	Will you use High speed Internet?							

Requirement Analysis & Negotiation

SR #	Questions	N/A	UN	VL	L	A	H	VH
1	Do you want to change or analyze the requirement again?							
2	Do you want to control over illegal duplication of reports of the user/client?							

Requirement Management

SR #	Questions	N/A	UN	VL	L	A	H	VH
1	Should in ILMS the business rules be followed strictly?							
2	Should the system offer access to internet at client level and access to server resources at server level?							

Requirement Validation

SR #	Questions	N/A	UN	VL	L	A	H	VH
1	Do you check the requirements for ILMS that meet your standard?							
2	ILMS requirement should be validate from any validation process?							

Business Performance Requirements

SR #	Questions	N/A	UN	VL	L	A	H	VH
1	Will all the system hardware is according to the competitors criteria?							
2	All the basis requirement for the ILMS mean's limitation of internet connectivity is for testing?							
3	Payment is on the time when the project is all delivered?							

System Modeling

SR #	Questions	N/A	UN	VL	L	A	H	VH
1	Which type of operating system used in your client systems?							
2	Should server is directly connected with the user/client system or through any other way?							

Requirement Process Deliverables

SR #	Questions	N/A	UN	VL	L	A	H	VH
1	After the delivering can you install the software by yourself?							
2	Is time is important constraint for delivering the ILMS?
